Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I:

Species I, Figures 1-4

Species II, Figures 5-6C

Species III, Figures 7-8B

Species IV, Figures 9A-9D, 11A-11D

Species V, Figures 10A-10D

Species VI, Figures 12A-12B

Species VII, Figures 13A-13B

Species VIII, Figures 14A-15D

Species IX, Figures 16A-16C

Species X, Figures 17A-17C

Species XI, Figures 18A-18D

Species XII, Figures 19A-19D

Species XIII, Figures 20A-20D

Species XIV, Figures 21A-21D

Species XV, Figures 22A-22D

Species XVI, Figures 23A-23D

Species XVII, Figures 24A-24E

Species XVIII, Figures 25A-25C

Species XIX, Figures 26A-26L

Species XX, Figures 27A-27U

Species XXI, Figures 28A-28B

Species XXII, Figures 29A-29B

Species XXIII, Figures 30A-30B

Species XXIV, Figure 31A

Species XXV, Figures 32A-32E

Species XXVI, Figures 33A-33C

Species XXVII, Figures 34A-34C

Species XXVIII, Figures 35A-35C

Group II:

Species I, Figures 36A-36B

Species II, Figures 37A-38A

Species III, Figures 38B-51B

Species IV, Figures 52-66

Species V, Figures 67-69

Species VI, Figures 70-73B

Species VII, Figures 74-80

Species VIII, Figures 81-95

Applicant is required, in reply to this action, to elect a single species from Groups I and II to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

3. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
